WORK EXPERIENCE

Camis Inc. | Reservation and Park Management SaaS Guelph, ON
Help Desk Technician I Mar 2025 – Present

- Perform root cause analysis on software issues, reproducing in controlled environments to identify underlying patterns, configuration dependencies, and actionable insights for resolution.
- Collaborate with the cross-functional teams to quickly troubleshoot and escalate configuration, performance, and software issues in line with SLA priorities and procedural guidelines.
- Manage user identity and access through Entra ID and ADManager Plus.
- Support Camis software by communicating features and functionality to technical and non-technical clientele.
- Awarded three recommendations from cross-functional teams within five months, recognizing my initiative and consistent performance beyond core responsibilities.

Freelance Web Development Toronto, ON
Web Developer Jan 2024 – Present

- Translate client requirements into functional web applications, applying SDLC principles from design to deployment.
- Utilize responsive design techniques to ensure optimal viewing across various devices.
- Work with local businesses to design web apps that reflect their brand identity while enabling intuitive customer scheduling and customer outreach using the WordPress platform.
- Partnered with MAPS Rentals Inc. (www.mapsrentals.ca), a boutique property leasing firm based in Ontario, to transform their leasing experience through innovative digital solutions. I developed a custom web app using modern frameworks, including React, Tailwind CSS, Material UI, and Framer Motion to deliver a responsive and engaging user interface.

The Mobile Shop Toronto, ON
Wireless Sales Associate Nov 2024 – Jan 2025

- Delivered excellent customer support and account troubleshooting in a fast-paced retail environment.

PROJECTS

Smart Checkout App | Thinking North, Smart Cities Hackathon May 2023

- Advanced into the in-person finals and placed first runner-up with an Android app that streamlined the no-cashier shopping process using TensorFlow computer vision.
- Trained a custom model on open-source data and optimized performance through iterative testing and parameter tuning.
